Revolutionizing Healthcare with LE0360® AI-Powered Solutions for Modern Medicine

Transforming patient care with cutting-edge AI robots and digital health platforms, accessible anytime, anywhere.

Lyons Global®

Lyons Global®, a California-based company with operations in the **USA, UAE, and Turkey**, offers cutting-edge digital health solutions designed to revolutionize healthcare delivery. At the forefront is the LE0360® Medical AI Robot, enabling real-time remote examinations and transforming patient care. Complementing this innovation is the LE0360® platform for integrated telemedicine services, My LEO Clinic for virtual clinic infrastructure, and LEO Global for international telehealth expansion. Lyons Global® also provides Digital Health Consulting to drive tailored healthcare transformation and a suite of AI-powered tools for automating SOAP notes, triage, scheduling, multilingual support, patient engagement, referrals, and education, ensuring efficiency, accessibility, and improved outcomes for healthcare professionals and patients alike.

 Visit Summary Writing	 Administrative Management	 Live Medical Examination
 Digital Follow-Up Management	 Integrated Medical Devices	 Real Time Health Data Transfer
 Digital Referral Management	 Secure Messaging	 PACS and Imaging
	 Digital Health Record	

LEO360[®]

MEDICAL AI ROBOT

The LEO360[®] Medical AI Robot revolutionizes healthcare with advanced technology, offering live medical examinations across 50+ clinical parameters and multi-specialty care. The robot seamlessly integrates with FDA-approved and CE-certified devices for real-time monitoring with tools like ECGs, digital stethoscopes, and ultrasounds. Supporting secure virtual consultations, health data transfer, and digital records, LEO360[®] enhances diagnostics, care management, and efficiency in hospitals, clinics, and remote settings worldwide.

Multi-Specialist Group Video Visit Around the Globe

LEO MAGIC

LEO AI Scheduling System

Matches patients with the most suitable healthcare professionals based on their needs and availability, optimizing appointment scheduling.

LEO AI Reminders

Sends personalized appointment and medication reminders to patients, ensuring better adherence to healthcare plans.

LEO AI Referral & Follow-Up Coordinator

Automates referrals and follow-ups, ensuring seamless coordination between specialists, doctors, and patients for ongoing care.

LEO CARE

LEO AI Triage

Simulates a professional doctor's intake process by asking patients relevant questions and recording their responses, reducing consultation times.

LEO AI SOAP Note Generator

Automatically transcribes doctor-patient interactions into structured SOAP notes, saving time and enhancing accuracy in medical documentation.

Multilingual LEO AI Communication

Breaks language barriers by offering real-time translation and multilingual support during consultations, making care accessible worldwide.

LEO AI Patient Education Tool

Delivers tailored educational materials to patients post-consultation, improving understanding and compliance with treatment plans.
